Mobile App Development Project

WEEKLY TEAM PROGRESS REPORT

GENERAL INFORMATION

Group Name:	Jellybean		
Mobile App Name:	Fittrack		
Phase Number:	☐P1 ☒P2 ☐P3	**Week Range:**	April 2 - April 9

SPRINT GOALS

What feature/module did you target this week?	1. Database implementation 2. Login Register 3. Completion/finishing of current features

ACCOMPLISHMENTS

Must be demo-able in Android Studio (GitHub) or APK (live Demo)	1. Implemented local database with login, register, and other features 2. Successfully created multiple event handlers 3. Finishing touches for current existing features

CHALLENGES OR BLOCKERS

Development-specific issues (Android):	1. Mismatches on database and java files 2. Errors and bugs
Human Resource-specific issues (team or time):	1. Need for multiple revisions to match team preferences

SOLUTIONS OR ADJUSTMENTS

Fixes applied, workarounds, or refactoring decisions:	1. Adjusted and rebuilt, until mismatch and bugs are gone.

INDIVIDUAL CONTRIBUTION MONITORING

Member	Role	Task Completed	%	Self-Rating	Remarks
Rocafor, Roxiz	**Front End**	Workout Tracker Page	80	4	No list of suggested workouts yet
Roxas, Hannah Kate	**Front End**	Dashboard Page	80	4	The A.I. insight is still not implemented
Sales, Vince Andrei	**Back End**	Login and Register	100	4	Already connected to database
San Francisco, Kyle	**Back End**	Database and Profile Setup	90	4	Database is built to be expandable for future features

Each member must honestly report their contribution.
Self-Rating Guide:
5 – Led tasks, highly active
4 – Consistent contributor
3 – Moderate contribution
2 – Minimal contribution
1 – Little to no contribution

PLAN FOR NEXT WEEK

Tasks/Features	Assigned Member	Expected Output
Finalize Design	**Hannah**	Final Design
Implement Design	**Roxiz & Hannah**	UI Design
AI Implementation	**Kyle**	AI Api or local AI
List of Suggested Workouts	**Vince**	Additional Feature for Workout Tracker
